

**AGENDA ITEM #8: INDIAN RIVER ROAD/KEMPSVILLE ROAD INTERSECTION: NON-TRADITIONAL INTERSECTION IMPROVEMENTS**

**SUBJECT:**

The Indian River Road/Kempsville Road Intersection is the most congested intersection in the City of Virginia Beach. The City has developed a unique approach to solving the congestion problem.

**BACKGROUND:**

The Indian River Road/Kempsville Road Intersection is the most congested intersection in the City of Virginia Beach and presents significant challenge with regard to improving traffic conditions at the intersection. The City considered a wide variety of alternatives for improving the intersection and ultimately selected a non-traditional approach. The City received a FY 2009 Congestion Mitigation and Air Quality (CMAQ) Improvement Program allocation of \$1.5 million for improvements at the Indian River Road/Kempsville Road intersection (UPC# 84366).

Mr. Robert Gey, P.E., City Traffic Engineer, and Mr. Richard Lowman, P.E., Traffic Engineer, will brief the TTAC on this item.

**RECOMMENDED ACTION:**

For discussion and informational purposes.
